Scary Cat Cake Stencil

Recreate this black cat silhouette by using an X-acto knife and a piece of cardboard. First, print out the template and tape it to your board. Then trace around the outline and cut out the cat, using a sharp blade. Be careful not to cut yourself!

TO DECORATE THE CAKE

- Chill the cake, then immediately before serving, center the stencil on top.
- Fill in the stencil with black sanding sugar, leaving the edges a little messy for a spooky effect.
- Add a candy-coated sunflower seed (find a variety at sunflowerfoodcompany.com) or half a yellow M&M for the cat's eye.
