

(Haunted) House Rules

Set the mood for mischief with these spirited crafts.

Download the templates and print onto card stock. Using a utility knife, cut out each silhouette and lightly score along its dotted lines, then fold the card stock back along the scores you just made. (If you're making the tall raven, cut a bamboo skewer to the size indicated on the template and tape to card stock as directed.) Next, apply craft glue to the bottom tab, as indicated on the stencil, and fold closed to form a triangular base. Place a few small stones or coins inside the base to weigh it down, if necessary.

Print out template and cut out around silhouette with craft knife. Score at dotted lines with bone folder and then fold back along creases. Cut bamboo skewer to 6" in length and tape to back of template, aligning skewer bottom with first fold line. Add glue to bottom tab where indicated and then fold and glue to form triangular base.
